

## Summer 2

**Learning Focus:** Know the decimal and percentage equivalents of the fractions  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{3}{4}$ ,  $\frac{1}{3}$ ,  $\frac{2}{3}$ , tenths and fifths.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts instantly.

### Representations

### Key Vocabulary

Concrete:

$$0.4 = \frac{4}{10} = 40\%$$

Pictorial:

Fractions (F), decimals (D) and percentages (P)

- Numerator
- Denominator
- Equivalent
- Convert
- Fraction
- Tenth
- Percent

### Getting Started

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

### Suggested Activities

- **Dominos** - write the fraction, decimal and percentage the domino is showing
- **Pairs game** - make your own fraction, decimal, percentage card matching game
- **Fraction / Decimal / Percentage Poster** - create a poster which explains how to convert between fractions, decimals and percentages
- **Let's go shopping** - look out for percentages when out shopping. What is X % as a decimal? What is X % off the given price?

## Key Vocabulary Explained

- **Numerator** - The numerator is the number written on the top of a fraction. It represents the number of parts taken out of the whole.
- **Denominator** - The number at the bottom of a fraction, which indicates how many equal parts a whole is divided into.
- **Equivalent** - The same as or equal to something else.
- **Convert** - To change the expression without changing the size or amount.
- **Decimal number** - A number with a decimal point.
- **Fraction** - A fraction represents the equal parts of the whole.
- **Hundredth** - One out of 100 equal parts. The fraction form is  $1 / 100$  and the decimal 0.01
- **Tenth** - One out of 10 equal parts. The fraction form is  $1 / 10$  and the decimal 0.1
- **Percent** - Parts per 100. It shows the ratio 'out of 100.'

$\frac{1}{2} = 0.5$	= 50%	$\frac{1}{100} = 0.01$	= 1%
$\frac{1}{4} = 0.25$	= 25%	$\frac{7}{100} = 0.07$	= 7%
$\frac{3}{4} = 0.75$	= 75%	$\frac{21}{100} = 0.21$	= 21%
$\frac{1}{10} = 0.1$	= 10%	$\frac{75}{100} = 0.75$	= 75%
$\frac{1}{5} = 0.2$	= 20%	$\frac{99}{100} = 0.99$	= 99%
$\frac{3}{5} = 0.6$	= 60%		
$\frac{9}{10} = 0.9$	= 90%
